Community Care RxSM Closes In On 500,000 Enrollments

Cleveland, OH - December 20, 2005 - MemberHealth, Inc. is pleased to announce that Community Care RxSM (CCRx), its Medicare Part D Prescription Drug Plan, will reach 500,000 enrollments this week. CCRx is one of 10 national Medicare-approved prescription drug programs available to Medicare beneficiaries in the United States, Puerto Rico, and the United States Virgin Islands. More than 57,000 pharmacies participate in the CCRx network.

CCRx, a collaborative effort among MemberHealth, Computer Sciences Corporation, and the National Community Pharmacists Association (NCPA), offers an appealing benefit to Medicare beneficiaries with substantial cost-savings on prescriptions, a broad formulary, extensive national pharmacy network, and accessibility to a dedicated call center.

“We are pleased with our initial enrollment numbers and feel that we have an exceptional Medicare Part D Prescription Drug Plan product offering,” said Charles Hallberg, founder and CEO of MemberHealth. “We expect our enrollment numbers to far surpass 500,000 this week. Medicare beneficiaries clearly recognize the benefits of a prescription drug plan they can trust. Our plans provide a very broad formulary without an expensive 4th tier co-insurance, giving

beneficiaries peace of mind knowing their current prescriptions, as well as unexpected future prescriptions, are covered by a reputable plan. Seniors are smart – they know there is no such thing as a free lunch and CCRx gives them a plan that they, as well as their pharmacist, have confidence in.”

“Pharmacists have embraced the CCRx plans because they encourage them to continue the face-to-face contact with their patients,” said NCPA Executive Vice President and CEO Bruce Roberts, R.Ph. “The pharmacist-beneficiary relationship is critical to the effective delivery of prescription medications and patient compliance. The medication therapy management component of the CCRx prescription drug benefit will enhance that relationship and encourage pharmacists to manage their patient’s risk in the retail setting, potentially saving the health care system millions of dollars.”

Eligible beneficiaries may enroll in one of three Community Care RxSM Part D plan offerings by completing and mailing an application, calling the plan’s customer service department, or applying on the web at www.communitycarerx.com or www.medicare.gov.

MemberHealth, Inc. is an innovative and rapidly growing Pharmacy Benefits Manager located in Cleveland, OH. MemberHealth, Inc. is dedicated to realigning interests within the delivery and distribution of pharmaceutical care by reinvigorating the personal interrelationships among the patient, provider, and the pharmacist. Education and outreach activity will primarily occur at local pharmacies. MemberHealth, Inc. anticipates that more than half of its participating network providers will support Community Care RxSM enrollment services.

Computer Sciences Corporation (CSC) founded in 1959, is a leading global information technology services company. CSC’s mission is to provide customers in industry and government with solutions crafted to meet their specific challenges and enable them to profit from the advanced use of technology.

The National Community Pharmacists Association (NCPA), founded in 1898, represents the nation’s community pharmacists, including the owners of more than 24,000 pharmacies. The nation’s independent pharmacies, independent pharmacy franchises, and independent chains represent an \$84 billion marketplace, dispensing nearly half of the nation's retail prescription medicines.
